[What was the challenge or opportunity?](#)

We are in an industrial complex and wanted to create a more environmentally friendly landscape out in our very warehouse-bare lawn area.

[What was your solution?](#)

Wetlands and conservation land is behind our building and all around, so we are planning a rain garden project this spring. We are partnering with the local conservation committee and the Great Bay Stewards. We are recruiting the community (boy scouts?) to help with the project and employee engagement.

[What is the impact?](#)

We're still in the very early stages. Hopefully we can grow veggies too!
