Company/Organization: PAX World

Number of Employees: 50

For-profit/ Nonprofit: for profit

Category: environment

Challenge or Opportunity:

We wanted to find a way to minimize our environmental footprint by coming up with a solution to our everyday waste usage.

Approach or Solution:

We found 'Mr. Fox' which is a local company that delivers compost containers to our company and then picks them up once a week. This allows each employee to do their part to better the environment we live in by composting their waste rather than the alternative.

Impact:

The impact has been the satisfaction of knowing we are doing the best we can to mitigate our environmental footprint.
