

Company/Organization: Colby-Sawyer College Experiential Based Learning

Contact: Todd Workman on behalf of Colby-Sawyer, toddworkman1@gmail.com

Challenge: Creation of new degree program focused on “Community Based Sustainability.”

Approach: Establish a small satellite campus in downtown Franklin in cooperation with PermaCityLife as a living lab with real world hands on learning

Impact: Four year degree condensed to 3 years with internships and capstone projects- which means a 25% savings on the cost of education while helping to revitalize NH’s smallest and poorest city with the greatest potential for change.
