Company/Organization: Medicus Healthcare Solutions

Type of organization: Business

Number of Employees: 320

Category: community

Challenge or Opportunity:

In August of 2017 Hurricane Harvey devastated the greater Houston area. Thousands were without shelter and access to basic necessities. Members of the Medicus Houston office and their families were also greatly affected by this storm as homes and cars were destroyed and the office itself closed for 3 weeks due to rising waters and impassable roads.

Approach or Solution:

Our Medicus Cares committee harnesses the charitable and philanthropic interests of our employees and the corporation. Through volunteering and charitable contributions the group looks to make impact in the communities which we live and work. Harvey hit our Houston office at a personal level, it was our duty to respond.

Impact:

Medicus Cares raised over \$10,000 to help our employees and partnered with Finders Keepers to help in distribution of aid for others. Our Windham headquarters served as a collection distribution center for employees and the community that saw 2 26ft trucks travel from Windham to deliver toiletries, clothing, diapers and other needed items to Houston
